

Overwhelmed

With The Old Way Of Labeling Your Files?

- Still printing name labels using your printer or typewriter?
- Tired of the time and expense of applying multiple labels to a folder?
- Still stockpiling rolled labels, name labels and year bands?
- Need only one letter or number and can't re-order due to minimum order requirements?

"Don't Change The Way Your Files Are Labeled ...Change The Way You Label Your Files"

Simplify Your File Labeling

Use Your PC, Printer & **NetLabels** To Make File Preparation A Pleasure

NetLabels makes everything simple. Now you can eliminate stockpiling individual labels, because when you need to make up a folder, you can print and apply just one label for that folder. What a relief!

With **NetLabels**, you don't change the way your files are labeled, you change the way you label your files. It's quick, easy and efficient. It's the 21st century way of doing business.

NetLabels can be accessed to print labels via the Internet or through installation on your computer.

NetLabels saves time & money by streamlining file labeling.

With **NetLabels**, we can match the colors of your existing color coded system and the arrangement of those labels on your files. You can print out a single strip label using your PC and color printer (laser or ink jet).

Our easy-to-use label applicator ensures that labels go on easily, cleanly and quickly ...in place every time!

With **NetLabels**, you have the option of typing in label information to print a single label, or you can open a file saved on your own computer system to print a batch of labels.

FOUR EASY STEPS

1) Type in your file label information or print a batch of labels from a local file.

2) Print out the label on your inkjet or laser printer.

3) Peel off the label

4) Apply...It's that Easy!
